Experience KIMBERLY AKIMBO Through Touch!

Join us for a Broadway Touch Tour with KIMBERLY AKIMBO, an immersive, behind-the-scenes experience designed for blind and low vision patrons and individuals with sensory needs. Before the performance, participants are invited on stage to explore the set, props, and costumes through guided, hands-on interaction led by members of the show's technical crew.

These tours provide valuable context for the performance and, when paired with audio description, offer a richer and more engaging way to experience the show. Audio description provides live narration of visual elements such as action, costumes, and scenery that are not conveyed through dialogue or music alone.

Space is limited! Please RSVP by Monday February, 2. Final instructions will be emailed along with confirmation. For accessibility services, please email guestservices@marcuscenter.org.
