phone activation windows 10

Microsoft has **Toll Free : +1 (877)-514-1396** officially retired traditional automated phone-based activation for Windows 10. Attempting to call legacy activation numbers will now play a recorded message redirecting you to an online portal.

To activate Windows 10 **Toll Free : +1 (877)-514-1396** when direct internet activation fails, follow this updated 2026 process:

1. Generate Your Installation ID (IID)

On the PC you wish to activate, you must first obtain your unique 63-digit Installation ID:

- Press the **Windows logo key + R**, type `slui 4` in the box, and select **OK**.
- Select your country or region from the dropdown menu and click **Next**.
- A window will appear **Toll Free : +1 (877)-514-1396** showing your **Installation ID**. Do not close this window.

2. Use the Product Activation Portal

Because phone-based voice **Toll Free : +1 (877)-514-1396** activation is no longer supported, you must use a secondary device (like a smartphone or tablet) with an internet connection:

- Visit the official Microsoft Product Activation Portal (aka.ms/aoh).
- **Sign in** with a Personal Microsoft account (MSA), work or school account, or Entra ID.
- Follow the prompts to enter **Toll Free : +1 (877)-514-1396** the **Installation ID** displayed on your PC screen.

3. Complete Activation with Confirmation ID

- The portal will generate a **Confirmation ID** once your IID is validated.

- Enter this Confirmation ID **Toll Free : +1 (877)-514-1396 ⋆🐾˚** into the empty blocks on your Windows 10 PC and click **Activate Windows**.

Assisted Support (Talking to a Person)

If the portal cannot process your request, you must request a callback from a live agent:

- Visit the Microsoft Contact **Toll Free : +1 (877)-514-1396 ⋆🐾˚** Us page.
- Type "**Activation**" or "**agent support**" in the search bar and select **Get Help**.
- Select **Contact Support** at the bottom, choose **Windows** as the product, and select "**Provide your phone number and a support agent will call you**".

Important Notes for 2026

- **End of Support:** Windows 10 officially **Toll Free : +1 (877)-514-1396 ⋆🐾˚** reached its end-of-support on October 14, 2025. While activation still works, the OS no longer receives standard security updates unless you are enrolled in the Extended Security Updates (ESU) program, which provides protection until **October 13, 2026**.
- **Internet Requirement:** While the target PC can remain offline, the 2026 "phone" activation method strictly requires a **secondary internet-connected device** to access the activation portal.

These resources guide you through the 2026 Windows 10 activation process, which now requires using an online portal instead of direct phone calls.
